Fact Sheet

Control and Reporting Point (CRP) Ämari, EST

(Source: Estonian Air Staff)

The CRP Ämari became operational in 2000 and has been performing 24/7 operations since. CRP Ämari works together with Control and Reporting Centre (CRC) at Karmelava, Lithuania, within the BALTNET framework.

During normal, centralized mode of operations, the 35-strong CRP performs only national tasks. Should the operational need arise or during exercises, CRP Ämari can partially take over the functions of CRC Karmelava; run surveillance operations, produce the Recognized Air Picture (RAP) and control air policing aircraft within the Estonian airspace.
