Press Release

NATO Family Day – 02 July 2008

Ramstein-Miesenbach (reu) On 2 July 2008, the premises of the CC-Air HQ Ramstein building became the venue for a big party as the first NATO Family Day kicked off at noon. But members of the HQ, NCSA Sector Ramstein and CAOC 2 Detachment had worked hard to set up various activities and to make the event the outstanding social highlight of the year. "Our headquarters' first NATO Family Day was a spectacular success!" says Senior Master Sergeant Pete Sorensen, one of the organisers of the

event. "Well over 500 people enjoyed the very sunny weather, music from the NATO Band, and food and drinks from 15 nations," he added.

The HQ staff, support unit staff and family members took a well-deserved break from operations and exercises, enjoying the company of colleagues and having a fun-filled day. "The highlight of the day was the international flavour and the display of culture and personality that already makes CC-Air a wonderful place to work," said General Roger A. Brady, CC-Air Ramstein's commander, "sharing in the tastes and flavour of all the nations made the first NATO Family Day an event to remember. What a superb day!" He also expressed his gratitude for all who worked behind the scenes to draw the event to the finish.

In addition to typical food and drinks from all nations represented in the HQ, attractions included a bouncy castle and face-painting for the children, outdoor games for the young and quite-not-so-young and the performance of a NATO Band made up from HQ staff. Best of all – the sun stayed with the happy crowd for the whole afternoon – another major contribution to the success of the first NATO Family Day at CC-Air Ramstein.
